**RE: Dune Grading Project Associated with Harbor Dredging
Tax Map21 Lot 22-23 Seabrook**

SUBJ: Wetland Delineation Report

Dear Select Board:

I am writing regarding a proposed dune grading project on my property at 6 Manchester Street associated with the US Army Corps of Engineers Harbor Dredging Project. We are proposing to regrade the sand dune in an area where the dune is growing at a rapid rate and this property borders a parcel owned by the Town of Seabrook. I am requesting your support for this project as it benefits the Towns interests by assisting with the Seabrook Harbor dredging project.

We have been coordinating this project with Eben Lewis of the NHDES Wetlands Bureau. The project will regrade approximately 5,000 square feet of dune on the Towns property by lowering it 1 to 3 feet. We have attached the site plan and it has been reviewed and supported by the Seabrook Conservation Commission (see attached documents). The entire area of temporary disturbance will be restored with native dune vegetation. State Agencies including the Fish and Game Department will review the Wetlands Application to be filed with the NHDES.

This completes our request and we hope to receive your support. Please call our office if you have any questions or require additional information.

Sincerely,

Dean Koravos
