Re: Rocks Road Connection Alternatives

On behalf of the Town of Seabrook, TEC, Inc. has completed a preliminary assessment to identify safer alternatives for traffic leaving Rocks Road to access Route 1. The west end of Rocks Road currently has the ability to access Route 1 but this intersection faces heavy north bound and south bound traffic on Route 1 making a left turn out of Rock's Road very difficult and causes cars to become backed up. Requests to The New Hampshire Department of Transportation (NHDOT) to incorporate a light at this intersection have been denied due to proximity to nearby signalized intersections. The intent of this assessment is to provide an alternate route for residents of Rocks Road to safely and efficiently access Route 1. TEC has identified two alternatives for the Town's consideration. We look forward to reviewing the attached alternatives and discussing the next steps.

Please do not hesitate to contact me directly if you have any questions regarding our assessment at (603) 601-8154. Thank you for your consideration.

Sincerely,
TEC, Inc.
