

Dear Mr. Manzi,

I write to seek permission for the NH Department of Environmental Services/Shellfish Program to once again use the Town of Seabrook's boat launch and dock on River Street in Seabrook. We did this last year (emails pasted below) so that we could perform our seawater sampling activities during the winter/early spring months when the dock at the state launch in Hampton was out of the water. They tell me the Hampton dock will be pulled later this week, so I am asking permission to use the town launch until April 2024.

We would be there 1-2 times per month with our 15ft Boston Whaler, and our sampling trips typically take 1.5 hours to complete. On or before April 2024 I expect we will go back to using the state launch in Hampton.

Thank you for considering the request.

Sincerely,

Chris Nash
NH Department of Environmental Services/Shellfish Program
